### New Surface Formulation And Carcass Construction Produces The Industry Standard For Positive Feed Web Blankets And High Quality Sheetfed Applications

**MacDermid Cordia** blankets utilize a highly researched blend of surface rubbers and foam layers to produce a blanket with superior resistance to solvents and abrasion. Additionally, its buffed surface reproduces both screen values and solids excellently.

**Cordia** blankets are built using a newly designed foam to produce a blanket with excellent performance across different platforms. Additionally, the design of **Cordia** provides low tension into the folder where applicable.

**Cordia** uses the latest fabrics in its carcass design to provide superior resistance to press chemicals wicking into the blanket, allowing for increased blanket longevity.

For the number one positive feeding blanket, count on the company that says "Yes We Can". MacDermid.
