

Star

Offset Blankets

The Blanket For High Quality Printing

Specifically designed to achieve to the highest quality printing, **Star** embodies all the characteristics of excellence: impressive solid coverage with faithful screen reproduction.

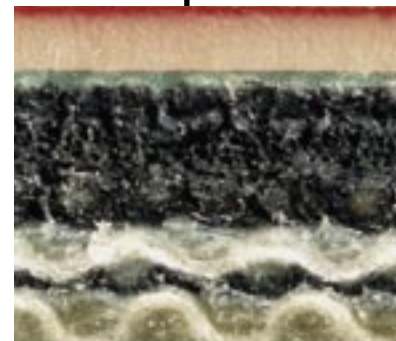

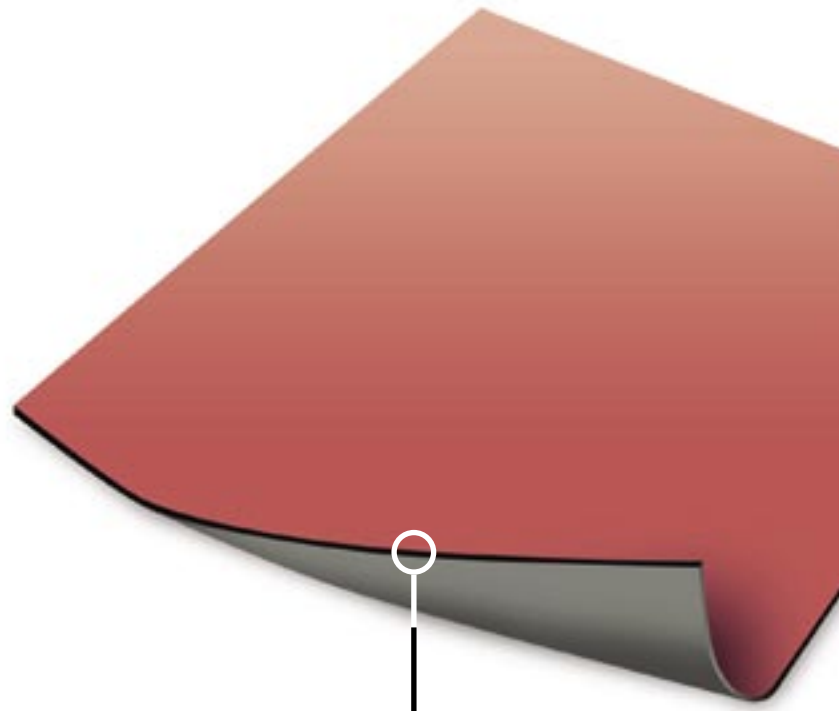

For blankets that meet even the most demanding specifications, count on the company that says "Yes We Can", MacDermid.

Key Features

- Smooth and even screen areas
- High density solids
- Excellent tone reproduction
- Low dotgain with respect to Fogra and Brunner standards & sharp printing

Segments

Sheetfed

Offset Blankets

Technical Specifications

General

Type:	Compressible
Colour:	Red-orange
Thickness:	1.96 mm
Maximum variation within 1 sqm blanket:	± 0.02 mm

Application

Small, medium and large format sheetfeds

Mechanical

Fabric plies:	4
Surface finish:	micro-ground and polished
Surface roughness (Ra):	< 1.1 µm
Thickness loss from installation and bedding:	In 2 to 3/100
Compressibility:	150 to 230 µm
Elongation to break:	3.5 ± 0.5

Applications

- High-end sheetfed commercial printing
- OEM certification
- Can be used in UV and Packaging

Performance

- Optimum geometry of the sharp
- Excellent tints cover
- Delivers uniform raster and solid densities over the full printed sheet and reduces calendars shocks
- High resistance to mechanical cancel matters
- High chemical resistance
- Compatible with traditional and UV inks printings
- Excellent dimensional stability

Technical Merit

- Star represents a breakthrough of MacDermid R&D
- The new homogeneous printing surface benefits from a radically different chemistry and is manufactured with newly developed processes
- The carcass design has high compressibility with balanced elasticity and dynamic damping
- Streaks elimination
